TROUSERS & JACKETS GALON®

PROGRESSION CONCEPT

WORK SHOES ORYX WORKSHOES

CATEGORIZATION BY BASE DESIGN & MATERIAL PROPERTIES

In this overview, we wanted to clarify how a number of garments in our collection are built on the same foundation and then developed and adapted for different purposes. This can, for example, involve linings, women's fit versions, or details that affect use, such as added hi-vis elements.

We've focused on the 'heavy-duty' products - jackets and trousers - where our customers often find a favorite model they use for a long time, without realizing that same favorite is available in other versions.

We've also grouped together garments that share the same functional core properties, for example garments in Galon®.

ABOUT SOFTSHELL

Most of the textiles in this category are constructed from a tightly woven microfiber that forms an outer layer with a finish that makes them windproof and water-repellent. Inside the jacket there is usually an insulating layer that keeps the material warm and wicks away moisture.

ABOUT SHELL GARMENTS

A shell jacket is a reliable outer garment for the working day, whatever the weather or work environment. It provides effective protection against wind and rain while remaining light and easy to wear during long shifts. Thanks to its breathability and layering options, the jacket easily adapts to temperature and activity level, helping deliver comfort all day long. The shell jacket is a flexible choice for both outdoor and changing work environments, combining function, durability and freedom of movement - qualities that make it a natural part of your workwear.

SHELL GARMENTS PRIO

PRIO stands for a conscious choice. For those who want reliable function and solid basic quality, without needing every extra detail. By simplifying the design and focusing on what's actually used in everyday work, we've been able to keep costs down. Fewer pockets, smarter construction and well-considered material choices make a big difference - without compromising on durability and function.

ABOUT STRETCH

Our stretch trousers are designed to give the right freedom of movement exactly where it's needed most. The stretch panels are strategically placed over exposed areas such as the knees and seat, providing increased comfort when working in varying positions. The result is a durable, flexible work garment that performs across many trades and environments - a well-considered choice for anyone who prioritizes mobility, comfort and function in everyday work.

ABOUT PREMIUM STRETCH

WHEN DUTY CALLS. In our premium segment of stretch trousers, you get a product developed for those who demand more from both comfort and performance. With advanced materials, a refined fit and extra reinforcement in exposed areas, they offer maximum freedom of movement and long-lasting durability. Nothing here has been left to chance - from smartly placed pockets to improved breathability and ergonomic design. And of course, a clear focus on stretch in all the right places! A first-class work garment for professional users who want the best in function, comfort and quality.

ABOUT TROUSERS PRIO

Of course, PRIO also offers work trousers at an attractive price! By focusing on function, durability and practical use, we've left out certain details that aren't essential in everyday work. The result is reliable work trousers that perform across many trades and work environments. A cost-effective solution for anyone looking for durable workwear with good comfort - without compromising on what matters most.

ABOUT EN 343

These garments are developed to provide reliable protection in work that demands resistance to rain, wind and moisture. By meeting the EU standard EN 343, the materials are guaranteed to be both waterproof and windproof while still offering good breathability. The construction is designed for demanding work environments and provides comfort even during long shifts in changing weather conditions. The result is functional workwear that combines weather protection, durability and freedom of movement - a safe choice for outdoor work all year round.

ABOUT GALON

For work in truly demanding weather conditions, where maximum protection against rain and moisture is essential, we have our Galon family. The fully waterproof material and welded seams provide reliable protection even during prolonged work in precipitation. The garments are durable and easy to keep clean, making them well suited to work environments where function and longevity are key. A reliable choice for anyone who needs rugged rainwear that can handle tough working days in wet conditions.

ABOUT

PRO GRESS ION

All garments in PROGRESSION are defined by the distinctive reflective trim that makes enhanced visibility standard. This also makes it very easy to mix and match the garments, while still being able to choose variations in, for example, the type of jacket, trousers or sweater.
